Profile & Research Interests

AI researcher in training with a genuine interest in applying machine learning and deep learning to solve real-world problems. My academic and practical experience has led me to explore several areas of AI — including natural language processing, computer vision, data analysis, and intelligent systems — giving me a broad yet grounded perspective on the field. I am motivated by rigorous research, whether fundamental or applied, and I am looking to deepen my expertise through a PhD in a stimulating academic environment.

Education

École Nationale Supérieure en Intelligence Artificielle (ENSIA) , Algiers Engineering Degree & Master's in AI and Data Science Comprehensive curriculum in ML, deep learning, NLP, computer vision, optimization, and intelligent systems.	Sep 2021 – Jul 2026
École des Hautes Études Commerciales (EHEC) , Algiers Master's in Management for Engineers — Dual degree integrated with ENSIA.	Sep 2024 – Jul 2026
UMass Amherst , Massachusetts, USA — SUSI EE Program Selected among 4 Algerian students for an exchange program focused on leadership and entrepreneurship.	Jun – Jul 2024
Lycée Frères Drif , Dellys — Baccalaureate in Technical Mathematics , High Distinction — 18.68/20	Sep 2018 – Jun 2021

Research Experience

Université de Sherbrooke — MOIVRE Lab , Research Intern — Final Year Project - Research on LLMs and multi-agent systems for the automatic generation of structured reports from heterogeneous data, under the supervision of Prof. Djemel Ziou and Prof. Sid-Ahmed Berrani. - Design and evaluation of AI pipelines for structured content generation; analysis of output robustness and consistency. - Exploration of reasoning, planning, and collaboration mechanisms between LLM agents.	Sep 2025 – Jun 2026
Algerian Space Agency (ASAL) , Data Science Intern – GeoAI Development of computer vision and deep learning models for the analysis and classification of satellite imagery.	Sep – Oct 2024

Professional Experience

Systelium , AI Consultant & Engineer - Design and deployment of AI solutions for business process automation, from exploration to production. - Delivered training sessions on AI tools and techniques for internal teams.	Feb 2026 – Present
Scaleo (HR Tech Startup), AI Engineer Intern Development of NLP and ML solutions for automating recruitment processes and skills assessment.	Jan 2026 – Present
Pysoft , Backend Developer Intern Development of APIs and database architectures using Django and Django REST Framework.	Jun – Sep 2023

Selected Projects

LLM Multi-Agent System for Content Generation (Ongoing) - Development of a multi-agent system based on LLMs for the automatic generation of structured content, with study of instruction impact on output quality and consistency. - Exploration of reasoning, planning, and collaboration mechanisms between AI agents.	
AI E-Learning Platform for Arabic Language Learning	

- Intelligent educational platform integrating NLP modules for linguistic analysis, automatic correction, and personalized learning paths.

GeoAI Solutions for Satellite Image Analysis

- Application of computer vision and deep learning models for segmentation and classification of spatial data using PyTorch and TensorFlow.

Electricity Consumption Prediction System

[GitHub](#)

- ML models with Python and Scikit-Learn for time series prediction, with comparative performance analysis.

Passenger Traffic Analysis — Changi Airport (2009–2019)

[GitHub](#)

- Time series analysis with statistical modeling, trend detection, and data visualization for decision support.

Web & Mobile Applications — Malabis, Salario, I CAré (Django, Flutter)

- Development of applications integrating intelligent features: recommendation, data processing, and adaptive user interfaces.

Technical Skills

Programming: Python (advanced), Java, C++, C, JavaScript, SQL
AI/ML: PyTorch, TensorFlow, Scikit-Learn, Pandas, NumPy, Transformers, LLM
Tools: Django, REST APIs, Git, Docker, Linux, Jupyter
Domains: NLP, Computer Vision, Multi-Agent Systems, Time Series, Data Science

Leadership & Engagement

Elite D’or Academy , Mentor — Public Speaking Club	Jun 2025 – Jul 2025
• Coached young participants to improve their English communication skills through structured mentoring sessions.	
SKILL & TELL Scientific Club , President	Jun 2024 – Jun 2025
• Led a volunteer team to plan and execute technical events and workshops for the student community.	
SKILL & TELL Scientific Club , Head of Events Department	Sep 2023 – Jun 2024
• Organized technical events, conferences, and workshops for the ENSIA student community.	
Google Developer Student Club (GDSC) , Member — Development Department	Nov 2022 – Jun 2024
• Active participation in technical workshops and hackathons organized by the club.	

Conference Participation

RCOY MENA 2024 , Amman, Jordan	Sep 2024
Regional conference on climate change, AI applied to renewable energy, and environmental preservation.	

Languages & Soft Skills

English: IELTS Band 7 **French:** TCF C1 (Score 554) **Arabic:** Native
Skills: Problem Solving, Critical Thinking, Communication, Teamwork, Leadership, Adaptability, Research Methodology, International Collaboration
